

ABOUT THE AUTHOR

Chi David A. was born in Awing-Santa, a village surrounded by hills and mountains where sunrise and sunset can easily be noticed in Mezam Division North West Region of Cameroon. He is a holder of B.Sc in Accountancy from Bamenda University of Science and Technology (BUST) in 2003 and Cisco Certified Network Associate Certificates (CCNA) in Network Fundamentals, Routing Protocols and Concepts in 2009 from Eastern Mediterranean University in Turkey.

He is currently focused on promoting Free and Open Source Software (FOSS) in Africa, Development of Business Software, Management Information System and Internet Security.

He is working with the Cameroon Baptist Convention Information Technology Department as technician and also a part-time lecturer of Information Technology in Bamenda University of Science and Technology (BUST).

Summary

Developing countries can easily join developed nations through the use of Information and Communication Technology (ICT). Africa in particular has a history of humiliation and dependency and it will not be good that this continues in the domain of Information and Communication Technology. This book titled Computer World, Easy Guide for Computer Users (A death blow to computer illiteracy in Africa) New Edition has come as a great beacon of light and of hope that will bridge the digital divide between developed and developing countries in the world.
